EDUCATION

PES University

Bachelor of Technology in Computer Science and Engineering
Current CGPA: 7.69

Sept 2024 – Present
Bangalore, KA

PROJECTS

ShelfLife – Full Stack Web Application

Nov 2025 – Dec 2025

HTML, JavaScript, PHP, MongoDB

- A full-stack web application to track product inventory and expiry, helping users manage and reduce waste efficiently
- Implemented secure backend integration with user authentication, account creation, and session management
- Developed a full-stack web application with frontend and backend integration
- Designed and connected a database system for data storage and retrieval
- Built and tested backend functionality for seamless client-server communication

Smart Traffic Monitoring System

Python, UDP, Edge Computing

- Built a distributed traffic system using edge nodes for real-time decision making
- Implemented UDP-based communication for low-latency telemetry
- Simulated 100+ nodes using multithreading to test scalability
- Secured communication using VPN-based encrypted channels (Tailscale)

Restaurant Booking System

Python, Tkinter (GUI), CSV

- Developed a GUI-based restaurant booking system with Tkinter for browsing restaurants and making reservations
- Implemented CSV file handling to manage user, restaurant, and booking data without external databases
- Applied object-oriented programming principles to structure restaurant, user, and booking functionalities
- Integrated robust error handling and data validation to prevent invalid bookings and ensure data integrity

HACKATHONS & COMPETITIONS

Terrathon Hackathon – AI Dermatologist Assistant

- Built an ML-based system to classify skin diseases (including skin cancer) from images
- Integrated a Gemini API chatbot with prompt engineering for precise symptom analysis and remedies

Cryovault CTF Hackathon – Participant

- Solved challenges in cryptography, reverse engineering, and security exploitation
- Worked on encryption techniques, binary analysis, and logic-based vulnerabilities

Algomania 3.0 – Competitive Programming

27th Place

- Top 40 out of 118 teams in prelims
- Demonstrated strong algorithmic problem-solving under time constraints

TECHNICAL SKILLS

Languages: C, C++, Python, Java (basic), HTML, CSS, JavaScript, PHP

Databases: MongoDB, CSV-based storage

Developer Tools: GitHub, VS Code, CLion, PyCharm, IntelliJ

CS Concepts: Data Structures & Algorithms, Database Fundamentals, Cryptography
